

Firefox clear cache

1. Click the menu button  and select Options.
2. Select the Privacy & Security panel.
3. In the **Cookies and Site Data** section, click Clear Data....

4. Remove the check mark in front of *Cookies and Site Data*.
5. With *Cached Web Content* check marked, click the Clear button.
6. Close the *about:preferences* page. Any changes you've made will automatically be saved.

Tip: Here's another way to clear the Firefox cache:

Click the Library button , click History and click Clear Recent History.... Next to **Time range to clear**, choose **Everything** from the drop-down menu, select **Cache** in the items list, make sure other items you want to keep are not selected and then click the Clear Now button.

Chrome clear cache

Computer:

In Chrome

1. On your computer, open Chrome.
2. At the top right, click More .
3. Click **More tools** > **Clear browsing data**.
4. At the top, choose a time range. To delete everything, select **All time**.
5. Next to "Cookies and other site data" and "Cached images and files," check the boxes.
6. Click **Clear data**.

Android

In the Chrome app

1. On your Android phone or tablet, open the Chrome app .
2. At the top right, tap More .
3. Tap **History** > **Clear browsing data**.
4. At the top, choose a time range. To delete everything, select **All time**.
5. Next to "Cookies and site data" and "Cached images and files," check the boxes.

Iphone * iPad

Before clearing cache & cookies

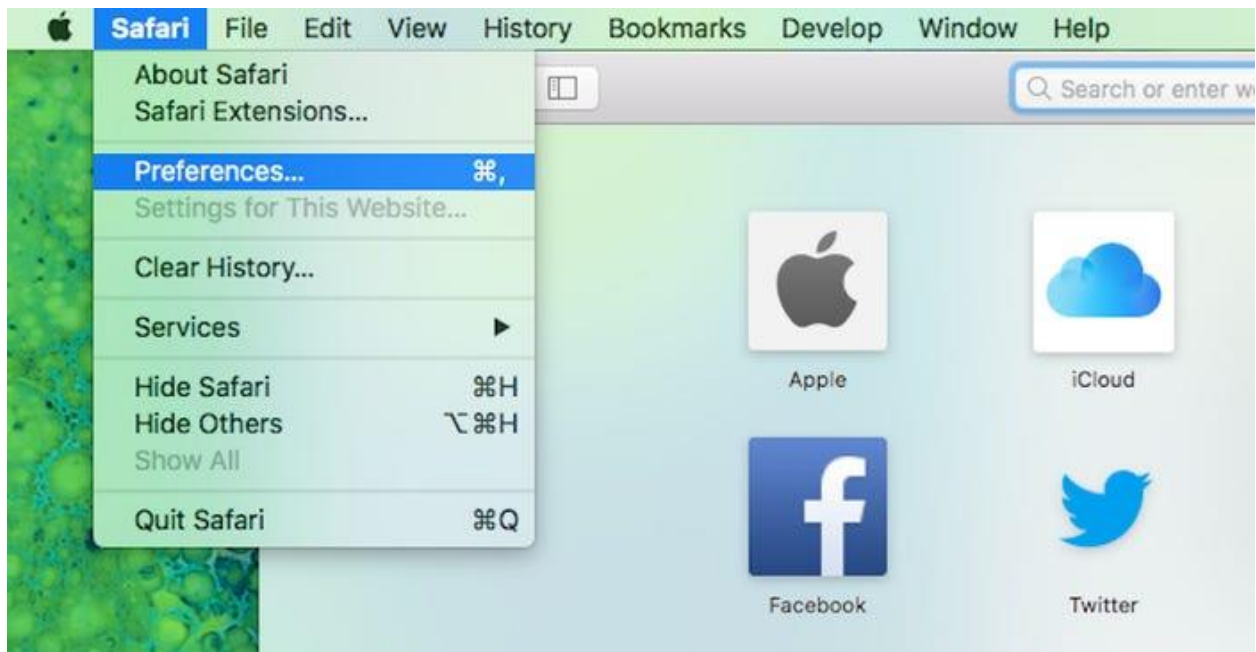

When you clear your cache and cookies, your browser might sign you out of your Google Account.

In the Chrome app

1. On your iPhone or iPad, open the Chrome app .
2. At the bottom, tap More .
3. Tap **History** > **Clear browsing data**.
4. Make sure there's a check mark next to "Cookies, Site Data," and "Cached Images and Files."
5. Tap **Clear browsing data**.

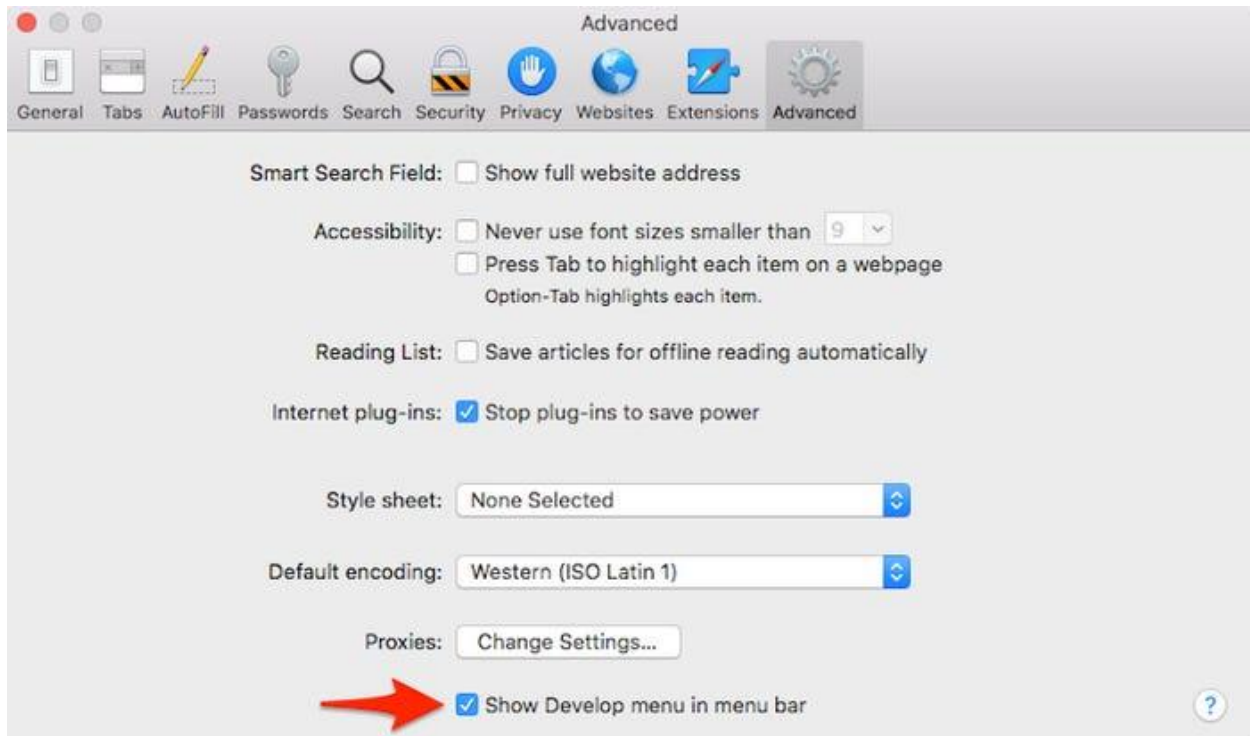

Safari clear cache

1. Click on the **Safari tab** at the top right of your screen and choose **Preferences** from the dropdown menu.

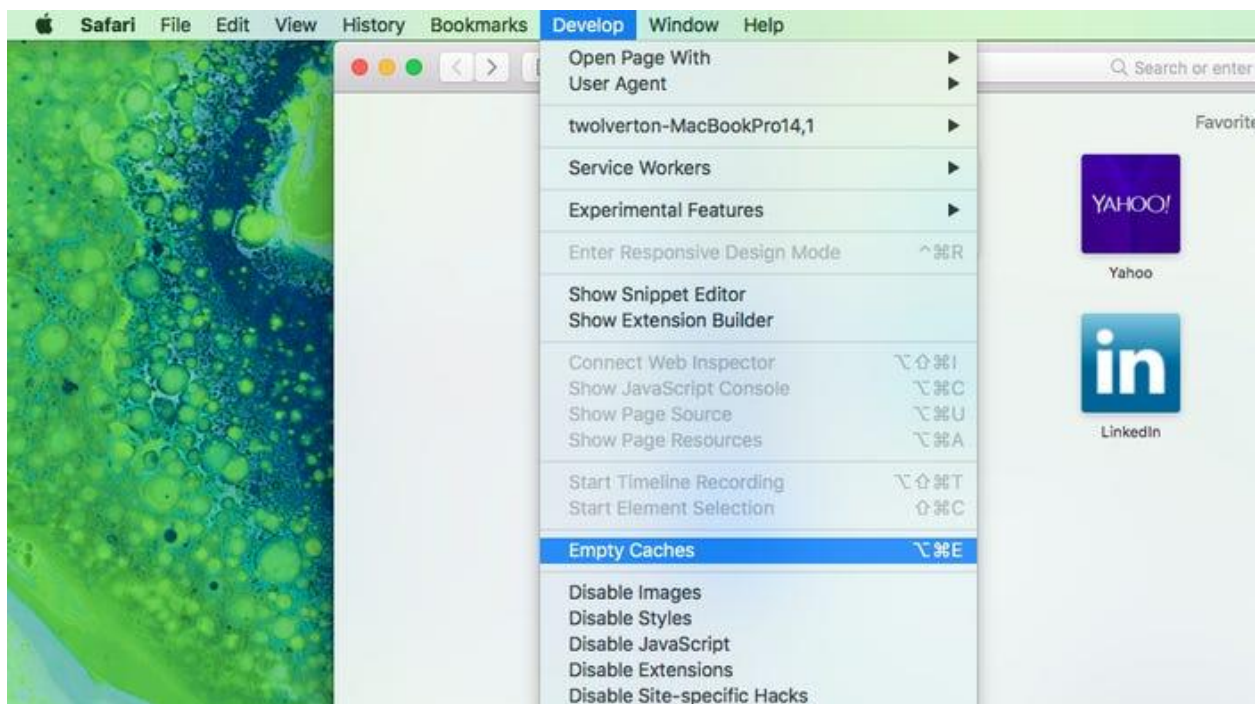

2. Click the **Advanced** tab of the menu that pops up.

3. At the end of the tab, select the "**Show Develop menu in menu bar**" box and close the Preferences menu.

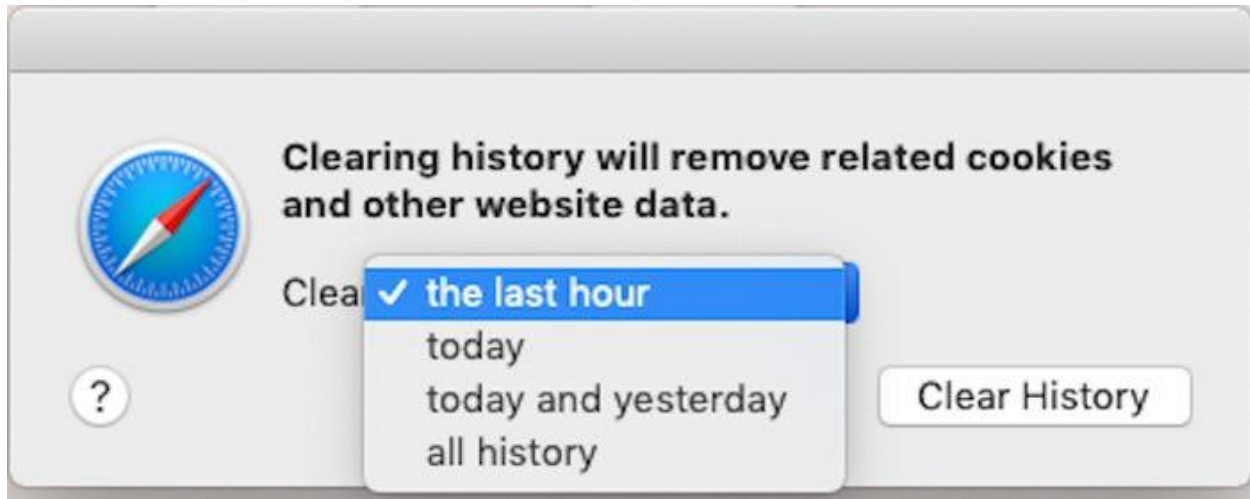

4. Click the **Develop** tab from the Safari menu at the top of the page.

5. Click **Empty Caches** from the dropdown menu.

You may also want to clear your browsing history in addition to emptying your cache. Here's how to do that.

1. Choose the **History** tab in Safari (pictured above).
2. At the very bottom of the dropdown menu, choose **Clear History**.
3. A box pops up with a choice to clear the last hour, today, today and yesterday, or all history. Choose your time frame and click the **Clear History** button.

If you're not sure how far back you want to clear your of your browsing data, err on the side of clearing less. You can always go back and clear out more later.

Any tabs you have open at the time you clear your browsing history will remain. You may notice that the Frequently Visited section no longer appears when you open a new tab. As you build up your browsing history again, those sites will reappear.

How to clear the Safari cache on [iPhone](#), [iPad](#), or iPod

You have two choices to clear your cache on Safari's mobile app.

To clear your entire browsing history and cache:

1. Open the **Settings** app.
2. Tap **Safari**.
3. Tap **Clear History and Website Data**.

Before you do this, you might want to check your iCloud settings (see below) to make sure you preserve your passwords.

What happens to saved passwords when you clear your cache

You may have had the experience of clearing your browsing history and cache and then discovering that your browser logged you out of your favorite websites. If you saved passwords in your browser so you could automatically log in to certain sites, clearing your cache can clear your passwords as well.

Happily, Apple has a solution to this problem. If you use iCloud, check your iCloud settings on your phone or computer. Make sure that you've checked the box for Safari.
